Layer 2 (night)	Blackout — BLOCK-X
Hardware	50 mm tube · standard bracket / clutch
Control	Manual or motorized, one per layer · Sync
Motor data	On request (per system)
Mounting	Interior · face or recessed
Fire reaction	On request (per selected fabrics)

### WHERE IT FITS

Guest rooms, meeting rooms, healthcare and premium residential where one window must switch between an open view and total darkness.

### AUTOMATION

Motorized SUNX shades integrate with standard building-automation and control systems through open compatibility (Sync) — no motor or control brand required.

### CERTIFICATIONS

Per selected fabric — on request
