SPECIFICATION

Type	Interior side-guided, tensioned
Guidance	Lateral guides (tensioned)
Hardware	50 mm tube · standard bracket / clutch
Control	Manual or motorized · Sync open compatibility
Motor data	On request (per system)
Max width / drop	On request
Mounting	Interior · face or recessed
Fire reaction	On request (per selected fabric)

WHERE IT FITS

Large or inclined interior glazing where a plain roller would sag or lift away from the glass and a flat, guided surface is wanted.

AUTOMATION

Motorized SUNX shades integrate with standard building-automation and control systems through open compatibility (Sync) – no motor or control brand required.

CERTIFICATIONS

Per selected fabric – on request
